Summary

:

My name is Shreyas Chavhan, I'm currently a second year college undergraduate at International Institute of Information Technology, Pune CSE ' 23. The contented feeling of making a difference is what drives me to work on projects that have an impact in the real-world. Currently giving my all to Protégé International Institute of Information Technology, Pune. I also enjoy having mindful conversations with interesting people. Having Good oratory skills is what I am working on and what excites me nowadays.

I like hunting for bugs and opportunities in my free time! I used to be shy but now confident about leading any situation and position. I am constantly working on my skills and have progressed a lot.

Being a Computer Science Engineering student, I was supposed to learn about coding, programming languages and data structure concepts, so I challenged myself for 100 days of consistent coding on 2nd of October 2020, and fortunately I could go beyond my goal and poured 135 days of consistent effort towards my goal. My 100 days of code ended on 9th of January. The concepts you learned, the logic you apply teach you a lot but I think that once you stop studying those things, stop coding for a bit while, you will certainly forgot many of those concepts. But the one thing that goes with you is that mindset that kept you motivated to reach your 100 days goal. The consistency you get, the self-confidence that you get is unbeatable.
I can now guarantee anyone and anybody, if you will challenge me for consistency, for my hard work and quality of results, I will never put you down.

I also love to connect with peoples. I Love to work with people with similar mindset.

The Sparks Foundation
Jan 2021 - Feb 2021 (2 months)
- Predicted the percentage of marks of an student based on the number of study hours.
- This task was based on a simple linear regression.

Education

International Institute of Information Technology

Bachelor of Engineering - BE, Computer Science and Engineering
2019 - 2023
Second Year Computer Science Engineering Student. Amazing College with amazing staff there. Spent first semester of my college life physically before lockdown. This COVID-19 started after that, spoiled my college life, still have great memories out there. Hope this thing will get better soon and I will be able to rejoin I²IT Family back as soon as possible. Anyways, Online lectures are great but meeting someone one-on-one have its own perks.

Jawaharlal Darda Junior Science College, Yavatmal

HSC Board Class 12th
2017 - 2019
Joined JDJSC, Yavatmal after class 10th. Took Admission in Science. Was preparing for JEE at that time, so its obvious that I don't have any relatable memory to share herewith. Anyways, Great college to be in.

Sanskar English Medium High School, Yavatmal

SSC Board Class 8th - 10th , School
2014 - 2017
Best School I have ever been to. I took admission in Sanskar English Medium School, Yavatmal when I was in 8th Grade. The school was one of the best school in Yavatmal city.

Was very passionate to join the school and really enjoyed 3 precious years of my life there. It is said that schools shape us to become more responsible adults. I think a good student is the product of a good school and I think SEMS have done a great job doing so. It helped me build my confidence. Little life lessons that I learned in this school is what helping me keep going forward in my life.

When I got my self enrolled in this school, the initial years passed like a breeze and were the best years of my school life but, as I advanced through grades, it taught me that life is not always easy. We fail in

tests, we stay awake at nights to finish assignments, we get scolded by teachers, but most importantly, we learn how to cope up with the hardships that life throws at us.
